

ravishing

"The Platinum Starlight is the **first** USB cable I have heard that can elevate the interface to an entirely new plane of fidelity. Through the Platinum

Starlight, soundstages expand and **breathe**, and string instruments, usually the *bête noir* of USB sound, at last sound like they're made of wood rather than plastic. The Platinum Starlight also gets timing right, which is equally rare. Tempos

are imperturbable when appropriate, yet tiny shifts are immediately audible.

The same is true of subtle **dynamic** changes. Bass is a high point, with superior pitch definition, and overall tonality is simply **ravishing**. Because this cable imposes virtually no grain on the sound, it allows for listening **deep** into the music, and for tiny jewels to emerge. For a long time I've been

looking for a USB cable I could call a reference. **The Platinum Starlight is it.**"

THE ABSOLUTE SOUND
