The next great step toward musical perfection

For Series 8, the patented DNA Helix designs have been upgraded by increasing the number of strand groups, which strengthens the electromagnetic field that moves the signal through the cable. With more groups of the world's purest OCC-7N copper, Eclipse 8 cables provide audible and measurable improvements in resolution and dynamic expression.

The Eclipse 8 cables also benefit from our new Composilex 3 insulation, which combines low loss with the lowest triboelectric noise ever for amazing purity and focus. The combination of these technical improvements provides surprising upgrades in recreating the power and delicacy of live music.

Other cables filter your music.  
Wireworld cables let the most music through.

**Technology that channels musical expression.**
