

CAUSE & EFFECT

design

The unique conductor geometry of the patented DNA Helix design creates a more efficient, smoother transfer of energy which sharpens waveform fidelity.

materials

Premium grade conductor materials and custom blended Composilex 2 insulation preserve purity of signal by smoothing current flow and minimizing noise.

testing

Each cable is scientifically tested during development against a direct connection, refining design and materials to achieve detail and openness that most closely matches the reference.

“

Wireworld has developed a superior USB cable that not only competes with the best USB cables I have heard, but can do some things better than all of the rest. The Platinum Starlight 7 USB 2.0 cable excels at just about every characteristic that audiophiles listen to when sonically judging a USB cable. This is one cable that I strongly recommend computer audiophiles audition when seeking the ultimate USB cable.

”

STEVEN PLASKIN | audiostream.com

All Wireworld cables are designed, built and tested to the same exacting standards as our flagship Platinum cables, regardless of price. Guaranteed for life.

Other cables filter your music.
Wireworld cables let the most music through.

Technology that channels musical expression.
