### Wireworld Oasis 8 Interconnects & Speaker Cables from \$100

Continuing with value proposition products I'd like to call your attention to Florida based Wireworld's Oasis 8 interconnects and speaker cables. I know what you're thinking, another cable company? Look I get it, there are a lot of cable companies but when I find gems like these I'd be remiss not share them.

I recently decided to move the VPI Cliffwood turntable in my bedroom system bedside for easier nighttime vinyl spinning. A pair of 25' RCA interconnects were needed to make this happen. These would be used to bridge the gap between the Modwright PH9.0 Phono stage sitting next to the turntable and the NAD M10 Streamer/DAC/ Amp located across the room driving a pair of KEF R3 Bookshelf Speakers.

I'm sure you know all too well prices for quality cables can quickly reach into the stratosphere, something I didn't feel justified for a bedroom system. A quick call to friend and Oklahoma dealer Jeff Harris of Reference Analog brought Wireworld's Oasis 8 interconnects to my attention. I'm happy to now pass on his excellent recommendation.

Prior to this I had no experience with Wireworld. To me they were just another on a

long list of cable companies. Wow was I wrong. What I've learned since is that Wireworld's cables are first class. This years Writer's Award focus specifically on their Oasis 8 interconnects. Why? Because in my experience given their performance they are excellent cables at very reasonable prices.

Wireworld agreed to send me a set of Oasis 8 RCA interconnects but asked that I also allow them to send a complete loom of Oasis 8 interconnects and speaker cables in order to experience their full effect. They would be replacing Nordost Purple Flair, no slouch!

The verdict? In my system Oasis 8 interconnects and speaker cables far exceeded my expectations. Their presentation is clear, crisp, uncolored, neutral, transparent, with plenty of detail, bass, and musicality. Honestly there is no downside with these cables. As the saying goes they perform well above their price category. Wireworld Oasis 8 are my new go-to recommendation for anyone on a budget looking for high quality cables.
