STEVE GUTTENBERG · AUDIOPHILIAC

Testing

Wireworld Cable Technology was founded with the unique mission of perfecting audio cables through objective listening tests. Far more revealing than normal cable comparisons, these tests compare cables to virtually perfect direct connections between components. Robert Harley, editor of The Absolute Sound, described this "Cable Polygraph" as, "illuminating insight into exactly how each cable affects the sound."

Technology

Cable Polygraph testing led to the DNA Helix conductor geometry (US Patent No. 8,569,627). Layered flat conductors with parallel strands prevent the 'eddy current' losses caused by twisted and solid conductors, providing superior preservation of musical detail, dimensionality and dynamics.

Materials

World's finest OCC-7N conductors and ultra-quiet Composilex 3 insulation preserve the power and delicacy of music.

Other cables filter your music.
Wireworld cables let the most music through.

Technology that channels musical expression.
